Subject: Portland Harbor bathymetric survey logistics

Hi Davis.

Below is a message we drafted to send to Jennifer Pretare at AECOM. We are looking to get some logistic information from her for our field oversight crew (if the work starts tomorrow), but it also reminds them that EPA needs those updated HASP and TSHA documents to review before approval can be given to start work tomorrow.

Thanks
Howard

Ken and Jennifer,
EPA has not yet received the revised pre-job hazard analyses for the bathymetric survey and the revised Programmatic HASP. Please send those ASAP if the Pre-RD Group has plans to initiate the Bathymetry tomorrow morning. Our contractor would also like to get some logistics information for the start of the bathymetric survey, assuming EPA receives the updated documents today and EPA approves the start. Please provide the following information:

- * Meeting location
- * Start Time
- * How and where will EPA/CDM Smith inspectors receive any required health and safety training for bathymetric oversight work? We plan to have one inspector on the survey vessel during the bathymetric survey.

Thank you,

Davis
